

MFJ 1932

GROUND RADIAL KIT ALL-BAND

The MFJ-1932 is an all-band ground radial system designed for the MFJ-2990 and other vertical antennas when a radial system is required.

It is a convenient and effective radial system that provides the necessary return path for ground currents to reduce ground losses. The MFJ-1932 consists of 2 sets of 4 radial wire assemblies giving a total of eight 14-foot radial wires. Each set has a 1/4 in ring lug for attaching to the antenna ground point. Each end of the radial wire has a solder lug for staking the wire end.
