

YAESU ATAS 120A

ACTIVE TUNING ANTENNA SYSTEM (AUTOMATIC)

Yaesu's patented ATAS™ (Active Tuning Antenna System) provides 7/14/21/28/50/144/430 MHz bands coverage with automatic motorised tuning on the Yaesu FT-100/100D/817/847/857/FT-897 transceivers.

Using control signals from the transceiver's microprocessor received via the coaxial cable, the ATAS internal motor adjusts the radiator length for the best SWR.

Specifications

Bands : 7-14-21-28-50-144-430 MHz
Length : 1,4-1,6 m.
Max. power : 120 W PEP
Connector : PL 259

Can also be used with other transceivers with MFJ 1925(I2). See info below.

ATTENTION! DO NOT USE ADDITIONAL EXTERNAL (OR INTERNAL) TUNERS WHEN USING THE ATAS.
