

ULTRABEAM ELEMENT GUY WIRE KIT UB50

UltraBeam Guy Wire Kit for 3 el. UB50

To increase the stability and to prevent sagging of the elements of the 3 ele. UB50 UltraBeam offers an optional guywire set with Phillystran guy wire. The length of the aluminum square rod is 50 cm, and is placed on the motor of the driver with a bracket. For attaching the guywire to the fiberglass elements, special UV-resistant plastic clips are included. The entire hardware is made of stainless steel material.

The guy wire set can be mounted without dismantling the antenna and is very suitable for regions with high wind speeds and with frequent winter conditions with icing.
