

SIRIO GAIN MASTER 5/8

10/11M BASE ANTENNA 5/8

MAX. 1 KW PEP

The Sirio Gain Master is the ideal DX antenna for 10/11m !

The antenna has been completely designed by electromagnetic simulation to achieve the maximum gain and optimize the radiation pattern and bandwidth. Engineered with the most advanced available technologies it is completely manufactured in Italy with high quality materials.

The new design of the radiant element (Patent Pending) works like a central feeded dipole so all RF currents on the radiator are in-phase and the ground plane radials are not necessary.

The coaxial coil at the bottom works like RF-choke for the optimum decoupling from mast and feeding line.

Made of 4 telescopic fiberglass tubes, it is DC-grounded for the best protection from static discharges.

Gain-Master™ is the new reference standard in its class of antennas.

Specifications

Antenna type : vertical 0,625 Lambda center fed dipole

Frequency range : 25,5-30 MHz

Impedance : 50 Ohm

Length : 7,36 with bracket

Max. power : 500 W CW (continuous); 1 kW PEP

Weight : 3 kg

Mounting mast : \varnothing 35-54 mm

Connection : SO 239
