

SIRIO BOOMERANG 27W

27 MHZ/CB BALCONY ANTENNA

Features of the Sirio Boomerang 27W Balcony antenna are:

- Balcon or temporary installation antenna
- Mono-band
- Omnidirectional
- Factory tuned at mid-band
- Tunable by whip length adjusting
- Fiberglass whip and radial with inside helical winding

Electrical Data

Type : 1/4 λ boomerang
Frequency range : 26,8-27,6 MHz
Impedance : 50 Ω
Radiation : 360° omnidirectional (H-plane)
Polarization : linear vertical
Gain : 0 dBd / 2.15 dBi
Bandwidth : 800 KHz @ SWR = 2
SWR : = 1.2 @ res. freq.
Max. power : 150 W PEP
Connector : UHF-female

Mechanical Data

Materials : Aluminium, Fiberglass, Steel, Copper, Nylon
Wind load : 39 N @ 140 km/h
Wind resistance : 140 Km/h
Wind surface : 0,031 m²
Height : 1,33 m. approx.
Radial length : 1,28 mm approx.
Weight : 750 gr approx.
