

MIDLAND 88

CB MOBILE RADIO AM/FM 12V/24V

The MIDLAND 88 is the fourth model of the new Midland M-series mobile CB radio from Midland in a fresh high-tech design and in a compact shape. It has a large TFT color display, front speaker, DIN dimensions, 3 different mounting options, including windscreen mounting and many other useful features.

The M-88 naturally complies with all European country standards and can be used with both 12V and 24V. The DS (Digital Squelch) function always ensures clear reception, without disturbing background noise. Thanks to the subtle night design the control elements can be easily found even in the dark.
