

ICOM IC-F29DR

DPMR446/PMR446 LICENSE FREE HANDHELD

Digital Licence-Free Comms with Professional Level Durability. The new Icom IC-F29DR is available with 16 digital channels and utilises 6.25 kHz narrow channel spacing. Even in urban areas where analogue PMR446 users often experience channel congestion, digital channels offer less interference. Therefore, it is so suitable for professional use.

Pan-European Licence-Free Communication

The IC-F29DR meets pan-European digital and analogue licence-free standards. The IC-F29DR is ideal for organisations and businesses where the workplace is constantly changing such as construction sites and events.

Digital and Analogue Dual Mode

The IC-F29DR can be used in both digital and analogue mode at the same time and can scan both zones at once. This allows an organisation to operate both digital and analogue radios in their fleets.

IP67 Waterproof and Dust-tight

The IC-F29DR can withstand 1 m depth of water for 30 minutes. This rugged construction provides dust-tight protection making it suitable for outdoor use.

Outstanding Audio Quality

800mW audio output is provided from the large 36mm speaker. The IC-F29DR can deliver loud and intelligible audio even in noisy environments

Group Call Communication

Similar to analogue CTCSS and DTCS codes, the digital Common ID also can be used for a group call. These codes and ID can be programmed to the 16 position rotary selector for instant call capability.

VOX for Hands-free Operation

With either optional headset* HS-94LWP or HS-95LWP, built-in VOX function provides convenient hands-free operation.

* HS-94 and HS-95 also can be used with OPC-2004LA.

Voice Announcement Function

When you rotate the rotary selector, the radio announces the selected channel number. The radio also announces the zone number and mode when the zone button is pushed.

12 types of Ring Tone

The Call-Ring function allows you to call your group members with 12 types of ring tone. When you prearrange any ring tone for an emergency, the ring tone can be used for an emergency alert.

Other features

- 26 hours operating time
- Channel Set Mode
- Power ON scan
- Tone scan (analogue)
