

KPS-28D

SWITCHING POWER SUPPLY DIGITAL 9-15 VDC | 20A CONT.

High Quality at a low price ! The KPS-28D is a very compact Switching Power Supply with variable output voltage, 20 A continuous.

Features

- Very compact, switching power supply, super lightweight
- Metal housing
- Has combined V-/A-meter (analogue)
- Noise offset control to suppress noise
- Connection on front- and backside
- Protection modes include short circuit and automatic current limiting within 30 A
- Has internal, temperatur controlled fan

Specifications

Input voltage : 220 VAC
Output voltage : 9-15 VDC, continuously adjustable
Output voltage tolerance : < 2%
Output current : 20 A continuous; 30 A max.
Output ripple/noise : < 80 mVp-p
Fuse : 5A
Dimensions : W 155 x H 70 x D 205 mm (projections not included)
Weight : approx. 1,5 kg
