

MFJ 16010

LONGWIRE ANTENNA TUNER

MAX. POWER 200 WATT PEP

The MFJ-16010 is a variable L-network random wire antenna tuner designed to match the low output impedance of your transmitter to the high impedance of a random wire (or vice versa). It will match almost any random length of wire to any transmitter from 160 thru 10 meters.

To match impedances that are lower than your transmitter impedance (such as a mobile whip), simply interchange the normal transmitter and antenna connections to the MFJ-16010.

Specifications

Frequency range : 1,8 - 30 MHz

Power : max. 200 W PEP

Dimensions : W 50 x D 76 x H 50 mm

Article id: **MFJ 16010**

Price: **€ 85,00**

ex VAT € 70,25
