

MFJ 989D

TUNER 1,8-30 MHZ

INPUT 3 KW | WITH ROLLER INDUCTOR

New and improved! World's most popular legal limit antenna tuner just got better! You get better efficiency, lower losses, and a new true peak-reading meter. Easily handles full 1500 Watts SSB/CW, 1.8 to 30 MHz including MARS/WARC bands.

Massive Transmitting Capacitors

New huge 500 pF air variable capacitors give you twice the capacitance for much more efficient operation on 160 and 80 Meters. Specially shaped plates give low minimum capacitance resulting in an extremely wide matching range -- 160 thru 10 Meters. New larger, more attractive capacitor knobs with easy-to-see dials make tuning much easier and precise.

Specifications

Frequency range : 1,8 - 30 MHz

Antennas : 2 coax lines, longwire and balanced line

Bypass : Yes

Dummyload : Yes

Balun : Yes, current balun 1:4

Meter : Cross-Needle meter; SWR, true active forward and reflected power range 3000/300 W. Incl. meter light (12 VDC)

Power : max. 1500 W PEP output

Supply voltage : 12 VDC (power cord included) or 9V battery

Dimensions : W 320 x D 280 x H 160 mm

We do not supply the AirCore roller inductor separately.
