

MFJ 962D

ANTENNA TUNER 1.8-30 MHZ

MAX. 1.5 KW | WITH CROSS NEEDLE METER/BALUN

The compact MFJ-962D handles 1500 Watts PEP SSB amplifier input power (800 Watts PEP SSB amplifier output power). Its perfect for Ameritrons best selling 800 Watt AL-811H or 600 Watt AL-811 amplifiers!

New features include MFJs AirCore Roller Inductor, new aluminum-skirted knob set including a weighted deluxe spinner knob, ultra compact size (10.75 x 4 x 10.875 inches) and scratch-proof multi-colored Lexan front panel. Two transmitting tuning capacitors and MFJs exclusive AirCore roller inductor gives you precise control to get your SWR down to an absolute minimum.

You get an extremely wide matching range from 1.8 to 30 MHz continuously including MARS and WARC bands. MFJs AirCore roller inductor has an air core that cant burn up. You get ultra high-Q, low loss and MFJs exclusive Self-Resonance Killer that eliminates damaging self-resonances.

MFJs lighted peak and average reading Cross-Needle SWR/Wattmeter makes tuning quick and easy. At one glance you can read SWR, forward and reflected power in two power ranges. Meter light uses 12 VDC or 110 VAC with MFJ-1312D. A 6-position ceramic antenna switch lets you select 2 coax lines (direct or through tuner), random wire and balanced lines. You get a heavy duty MFJ TrueCurrentBalun for balanced lines. High-voltage ceramic feedthru insulators let you operate high power into balanced feedlines.

Specifications

Frequency range : 1,8 - 30 MHz

Antennas : 2 coax lines and balanced line

Bypass : Yes

Dummy load : No, SO 239 for external Dummy load

Balun : Yes, Current balun 1:4

Meter : Cross-Needle meter; SWR, forward and reflected power in 3000/600 and 300/60 watt ranges. Incl. meter light (12 VDC)

Dimensions : W 280 x D 295 (excl. conn.) x H 113 mm
