

AMERITRON ATR-30X

HF TUNER MET AIRCORE VERZILVERDE MESSING BANDROLSPOEL

The Ameritron ATR-30 handles well 1500 Watts continuous carrier output even on 160 Meters.

A gear driven turns counter and crank drive the edge wound super high current air core roller inductor. It can carry huge circulating RF currents and withstand tremendous heat.

Two 500 pf variable air caps with 6:1 vernier reduction drives makes tuning smooth and easy and give no-arc wide range impedance matching for high power performance.

A heavy duty three core choke balun lets you match virtually any balanced antenna without core saturation.

Ameritron active electronic true peak reading meter accurately reads forward-, reflected power and SWR simultaneously on a lighted Cross-Needle Meter.

Specifications

Frequency Range : 1,8 - 30 MHz

Cross Needle Meter : dual rotary coil meter for true peak reading forward-, reflected power and SWR

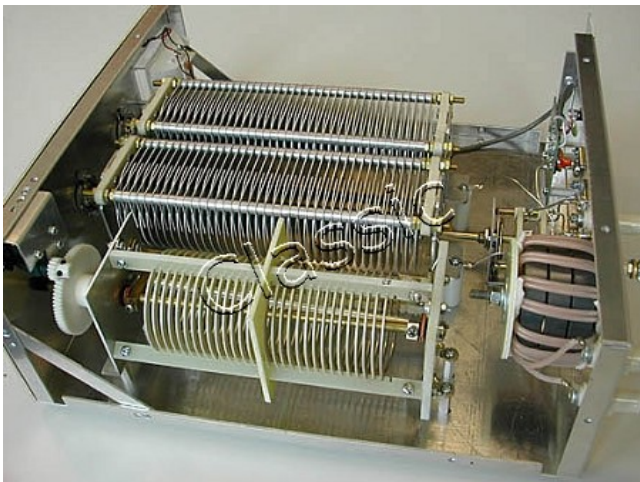

Antennas : geschikt voor open lijn, langdraad en 2 x coaxgevoede antenne
Bypass : yes

Dummyload : No; 1 x SO 239 at the back for external dummyload

Balun : 3 core heavy duty current balun

Max. power : 1500 W continuously

Afmetingen : B 437 x D 350 x H 140 mm
