

PKW BALUN BEAM 30-40 M.

FOR 7-10 MHZ

This 1:1 balun for PKW beams is supplied with stainless steel clamp for boom mounting.

For frequency range 7-10 MHz.

Max. power 2 kW PEP.

CAUTION

DO NOT use this currentbalun with any type of antenna tuner or match box when the VSWR (before matching) is greater than 3:1. If the VSWR is below 3:1, a match box can be used as long as the power levels are kept below the limits shown in the Specifications. When these power and VSWR limits are exceeded, the extremely high standing wave voltage present at the feedpoint causes the breakdown voltage of the balun to be exceeded.
