MAGNETIC LONGWIRE BALUN 1:9 | 300 W PEP

With this 1:9 magnetic longwire balun you simply match your end-fed wire antenna to 50 Ohm coaxial feedline; most of the time no extra tuner needed. Minimum wire length for the higher frequencies is approx. 5,5 m., for the lower frequencies approx. 12 m. Balun will handle 300 Watt PEP max.

The balun can be easily mounted with our optional aluminium plates and steel hose clamps, antenna wire and insulators (see related items below).

Specifications

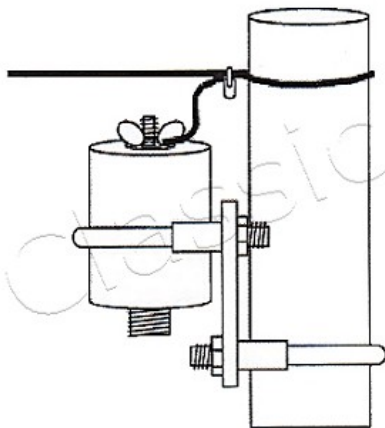

Frequency range : 100 kHz - 200 MHz

Length longwire : min. 5,5 m. for higher frequencies; min. 12 m. for lower frequencies

Diameter balun : 50 mm

Connector : SO 239 (PL female)

Max. power : 300 W PEP
