MAGNETIC LONGWIRE BALUN 1:9 | HIGH POWER 800 W PEP

With this 1:9 magnetic longwire balun you simply match your end-fed wire antenna to 50 Ohm coaxial feedline; most of the time no extra tuner needed. Minimum wire length for the higher frequencies is approx. 5,5 m., for the lower frequencies approx. 12 m. Balun will handle 800 W PEP max.

The balun can be easily mounted with our optional aluminium plates and steel hose clamps, antenna wire and insulators (see related items below).

Specifications

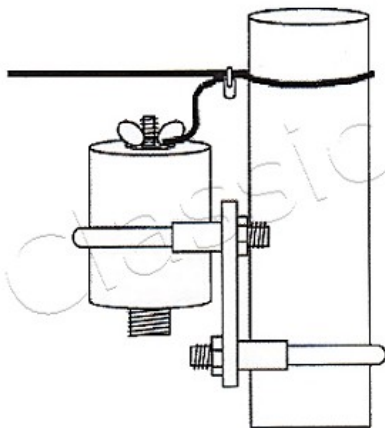

Frequency range : 100 kHz - 200 MHz

Length longwire : min. 5,5 m. for higher frequencies; min. 12 m. for lower frequencies

Diameter balun : 60 mm

Connector : SO 239 (PL female)

Max. power : 800 W PEP
