

HEIL SOUND CC-1XLRY-BAL

ADAPTER CABLE 8-P. YAESU
ROUND - 3-PIN XLR FEMALE
STRAIGHT CABLE - BALANCED

The FT-950 has some serious internal ground loop problems that creates an RFI problem to some of their transceivers. Heil introduced the new CC-1-XLR-Y-BAL cable (with orange top) that solves this problem. It only works with our 3-pin XLR microphones. This only works on the late model FT-9000, FT-5000, FT-2000 and the FT-950.

You will continue to use the CC-1-XLR-Y (Yellow Top) cable for all other Yaesu and any of our 3 pin balanced output PRO microphones.

To be used with:

- Yaesu FT-950
- Yaesu FT-2000
- Yaesu FT-DX1200
- Yaesu FT-DX3000
- Yaesu FT-DX5000
- Yaesu FT-DX9000

in combination with microphones:

- Heil PR-781
 - Heil PR-20
 - Heil PR-30
 - Heil PR-35
 - Heil PR-40
- and other professional microphones (600 Ohms)
