

YAESU M-100

DUAL-ELEMENT DESKTOP MICROPHONE

Yaesu M-100 Dual-Element Desktop Microphone.

The Yaesu M-100 features two built-in microphone elements, one dynamic and one condenser type. The unique output signals may be individually crafted and then blended to produce a single rich voice signal. The included treble boost cowlings may be installed to block sounds from the side.

*) The RJ45 and 8P sockets in the base of the MD-100 are internally connected 1:1. The supplied microphone cable has RJ45 on one side and an 8-pin round plug on the other. You can therefore use the cable for devices with RJ45 as well as for devices with an 8-pin round microphone plug. Simply reverse the cable.
