

YAESU MEK-2

MICROPHONE EXTENSION KIT

The YAESU MEK-2 microphone extension kit is a junction box for use with the Yaesu Transceivers, which allows connecting a variety of microphones with a round 8-pin plug to a transceiver with a modular plug. Each side of the MEK-2 has a modular jack. The left side is for the Mic/Controller and the right side is for the transceiver.

Will work with the following:

- FTM-300DE
- FT-8900
- FT-8800
- FT-7900

The MEK-2 is supplied with:

- MEK-2 junction box
- Modular to modular microphone extension cable 9.8 feet (3 m)
- Double sided adhesive tape
- 2 tapping screws
- 2 machine screws

NOTE: Not all microphones with 8-pin plugs can be used with this kit, including some Yaesu mobile microphones, as well as some other mobile microphones. Specifically, this is not for use with the MH-85A11U. The MD-100A8X will not work with this kit due to an impedance difference.
