

YAESU SP-8

HIGH FIDELITY LOUDSPEAKER WITH AUDIO FILTERS

The Yaesu SP-8 is a base speaker with audio filters, suitable for a wide range of applications.

Features

- Manual Frequency tailoring specifically intended for amateur and general communications modes.
- Wideband tailoring for: broadcast listening, music and FM reception.
- Independantly-adjustable low-cut and high-cut filters offer twelve possible audio response configurations selectable from the front panel, enabling the operator select optimum response under all conditions and modes.
- Two separate inputs, selectable by a front panel switch.
- Two output jacks (1.4-inch and 3.5mm) for headphones are provided on the front panel.
- Adjustable front feet.

Specifications

Frequency Range : 100 - 1200 Hz
 Filter Circuit Selections (approx):
 LOW 1 : below 300Hz (-6dB/octave)
 LOW 2 : below 600Hz (-6dB/octave)
 HIGH 1 : above 2.4kHz (-6dB/octave)
 HIGH 2 : above 1kHz (-6dB/octave)
 HIGH 3 : above 700Hz (-6dB/octave)
 SSB : above 2.4kHz (low pass filter)
 CW : 600 - 700Hz (peak filter)
 Speaker Diameter : 120mm
 Power Rating : 3 W
 Impedance : 8 Ohm
 Case Size : W 200 x D 305 x H 155 mm (incl. feet)
 Weight : approx. 2,8 kg
