

YAESU FC-50

AUTOTUNER FOR YAESU FT-891

The Yaesu FC-50 is an automatic antenna tuner designed expressly for the FT-891. The control cable (ca. 50 cm) and coaxial jumper cable (ca. 50 cm) are included. Two joint plates are also included if you wish to physically join the FC-50 and FT-891.

Specifications

Frequency range : 1.8 to 29.7 MHz + 50-54 MHz Amateur Bands
Input impedance : 50 Ohm
Max. power : 100 W PEP
Tuning power : 4 to 60 W
Memories : 100
Tuning time : 5 seconds or less
Antenna matching impedance : HF ->16-150 Ohms; 50 MHz -> 25-100 Ohm
Power Supply : 13.8 VDC (derived from the transceiver)
Dimensions : W 155 x H 45 x D 211 mm
Weight : 1,35 kg

Image shown is with FT-891 (not included)
