

# KENWOOD PKT-23E

## PMR446 LICENSE FREE

Kenwood announces a New-style Analogue ProTalk 446: The new PKT-23. This hand-portable is designed for 'Light Weight and Simple Operation', making it the ideal license-free radio for Retail, School, Restaurant, Shopping Mall, Hospitality and so on.

### Key Benefits

**Small :** At 110 g, it is the smallest & lightest 2-Way Radio from KENWOOD PMR446

**Simple :** Simple and license-free operation in an all-in-one package ready for immediate use.

**Tough :** Complies with IP54 (dust/water resistant) and durability meeting or exceeding MIL-STD 810 C/D/E/F/G 11 items.

**Powerful :** 500mWatts Transmit Power. Up to 15 hours of operation (5-5-90; battery saver ON)

### Key Features

**Simple and easy to use - No license required**

This license-free two-way radio comes with a 1430mAh Li-Ion rechargeable battery, battery charger and belt clip; there's no need to buy extra accessories for basic operation. It is ready to use right away.

### Light Weight and Simple Operation

Fitting in the palm of your hand, the PKT-23 is easy to take anywhere your staff needs to go. At only 110g, it can fit comfortably in an apron pocket or attached with the included belt clip; there's no need to buy extra accessories for basic operation. The front panel button layout makes the PKT-23 easy to operate.

### Compact, reliable and robust

Users will appreciate just how light (110g) this radio is. Yet, there is no compromise on build integrity; it meets or exceeds the IP54 dust and water intrusion standards as well as MIL-STD 810 C, D, E, F & G environmental standards, making it tough enough for outdoor use in any weather.

### 8 Channels with Voice Guide

The PKT-23 provides up to 8 channels, allowing you to assign channels to specific team members. The Voice Guide alerts you when you change channels. All channels are the approved UK/EU PMR446 Service frequencies for full compatibility.

### Built-in self programming

Users can change several settings, channel frequency, QT tone or DQT code without using programming software.

### Feature Definition: "Wireless Cloning"

The PKT-23 includes Kenwood's exclusive wireless cloning which allows cloning of multiple portables by a single master portable with a simple "push of a button"...with no cables or wires attached.
