

HYTERA PD785G VHF - WITH GPS

DMR VHF HANDHELD
DIGITAL/ANALOGUE/GPS
OUTPUT 5 W

The Hytera PD785G is a VHF (2 m) resp. UHF (70 cm) handheld device that supports the digital DMR standard.

The PD785G offers with its ergonomic design a high operating comfort. A large TFT display and large size buttons, arrange a error-free operation under difficult Light conditions. For quick access to different services and features over 20 keys can be programmed individually.

Even in noisy environments, the PD785G with this excellent voice quality ensures a good readability. Narrowband codec and digital error-correction technologies provide a stable signal even in poor conditions in the digital mode. Of course, you can work with this handheld radio also in normal analogue FM.

The device has the requirements of MIL-STD 810 C/D/E/F/G standards.

The PD785G has the same features as the PD785, but is with a built-in GPS receiver. This allows your position displayed and even short text messages are transmitted.
