

YAESU GA3000

ABSORBER JOINT G-1000/G-2800

Absorber joint voor Yaesu G-1000/G-2800DXC

The GA-3000 is a tremendous aid in prolonging the life of your tower and rotator when turning very large arrays. It's heavy-duty rubber bumpers eliminate the metal-to-metal fatigue that, over time, can damage tower installation, and it conveniently mounts between the rotator and the tower's rotor shelf. Mounting hardware is included.

GA-3000 allows rotator base to compensate for up to 2 degrees of offset from vertical.

Dimensions of tower's rotator plate : 165 x 165 mm
