

CREATE RC 5-3-P

AZIMUTH ROTATOR, INCL. CONTROL UNIT AND PC TERMINAL

The CREATE RC-5-3 is an azimuth rotator for lightweight antenna systems. The control unit has variable speed, preset function and PC interface connection.

Always buy a rotator one size larger than actually needed !

All Create rotators have a 1/60 worm gear, making for quiet operation and effectively countering any backlash from the antenna. The worm gear mechanism results in a larger braking and rotation torque.

Specifications

Rotating torque : 60 Nm
 Brake torque : 785 Nm
 Mast Size : 48-63 mm
 Max. vert. load : 400 kg
 Rotation speed 360° : 75-180 sec.
 Preset function : no
 Controller interface : yes
 Weight : 6 kg
 Control Cable : 7-core (not included)
 Connectors : included

To avoid RF interference in the control unit causing inaccurate readings keep control cable away from the coaxial antenna cable. When transmitting over 500 W clearance should be at least 20-30 cm.
