

CREATE RC 5-1

AZIMUTH ROTATOR, INCL. CONTROL UNIT

Always buy a rotator one size larger than actually needed !

All Create rotators have a 1/60 worm gear, making for quiet operation and effectively countering any backlash from the antenna. The worm gear mechanism results in a larger braking and rotation torque.

Specifications

Rotation torque (kg/cm) : 600
Braking torque (kg/cm) : 8000
Mast size (mm) : 48-63
Max. vert. load (kg) : 400
Rotation speed 360° (sec) : 75-110 (var. speed control)
Preset function : no
Controller interface : no
Weight (kg) : 5
Control Cable : 7-core (not included)
Connectors : included
Motor : RC5/FE10S, RC5A/F7E25S, RC5B/JH7E40S

To avoid RF interference in the control unit causing inaccurate readings keep control cable away from the coaxial antenna cable. When transmitting over 500 W clearance should be at least 20-30 cm.
