

CREATE ERC-51

ELEVATION ROTATOR

ERC51 Rotator

Buy a rotator always one size larger than needed !

Also take into consideration, that the specifications mentioned are for a max. height of 18 m. above ground. Above 18 m. add 1 kgf/m (= 0,1 N/m).

The Create ERC-51 elevation rotator is meant for middle sized antenna systems and has a "preset" function.

Specifications

Rotating torque : 20 kg/m

Brake torque : 100 kg/m

Turning range : 140°

Max. antenna load : 50 kg

Mast diameter : \varnothing 48-68 mm

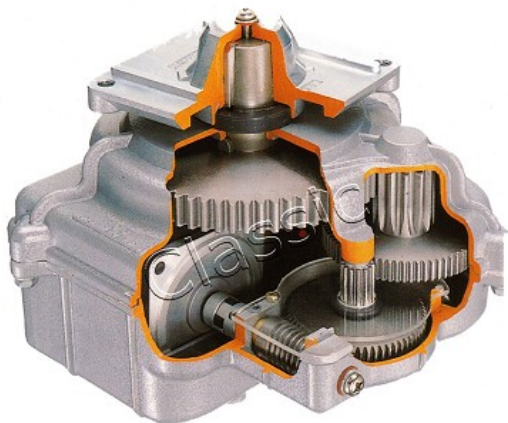

Boom diameter : \varnothing 40-62 mm

Weight : Rotator - 8 kg | Controller - 2 kg

Dimensions : Rotator - W265 x D225 x H225 mm | Controller W170 x D173 x H123 mm

Power requirement : 230 V - 0,8 A

Control cable : min. 7-core x 0,75 mm² until max. 50 m. length (not included)
