

CREATE ERC-5AP

HEAVY-DUTY ELEVATION ROTATOR

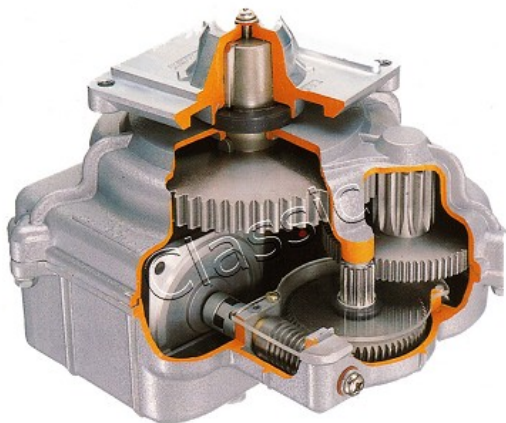

Buy a rotator always one size larger than needed !

Also take into consideration, that the specifications mentioned are for a max. height of 18 m. above ground. Above 18 m. add 1 kgf/m (= 0,1 N/m).

The Create ERC-5AP elevation rotator is meant for large antenna systems and has a "preset" function.

Specifications

Rotating torque : 480 Nm
Brake torque : 6000 Nm
Rotation speed : var. 75-180 sec./90°
Max. antenna load : 200 kg
Mast diameter : \varnothing 48-65 mm
Boom diameter : \varnothing 48-65 mm
Weight : 19 kgs
Dimensions : Rotator - W440 x D350 x H270 mm | Controller - W170 x D171 x H113 mm
Power requirement : 230 V/50 Hz
Control cable : min. 7-core x 0,75 mm² until max. 25 m. length; 1,25 mm² longer than 25 m. length (not included)
