

ICOM M-35

VHF MARINE HANDHELD | WATERPROOF | WITH CLEAR VOICE + VOICE BOOST

This new Icom M-35 VHF Marine Transceiver has Clear Voice + Voice Boost and floats too!

Clear voice boost (Clear voice + Voice boost)

In marine environments there are many sources of noise that can affect the quality of your communication, such as engine noise, roar of waves and more. The IC-M35 constantly transmits clear voice and provides boosted audio even in those circumstances and ensures your conversation is sent and received as clearly as possible no matter how noisy the background is!

And yes, it floats too!

Continuing the legacy from the IC-M33, the IC-M35 floats for you to be able to retrieve it if you should ever lose it overboard. The IC-M35 floats even when the optional speaker microphone, HM-165 is attached.

LOUD button

When you need an instant "boost" in the volume, a simple push of the "LOUD" button gives you full volume immediately. In addition, holding the "LOUD" button mutes the audio output.

Noise cancelling microphone

The sub-microphone on the rear panel inverts phase and cancels out ambient noise from the main microphone. As a result, the IC-M35 reduces the affect of background noise (particularly treble noise) from the transmitted signal and makes it easier to catch voice communication.

Automatic volume adjustment

When in an engine room or high noise environment, the sub-microphone detects the ambient noise and the IC-M35 automatically increases the volume output to suit the surrounding environment.

Low power consumption

Although the IC-M35 delivers a high 6W*1 RF output and 700mW audio output, its current saving circuit offers a practical 8 hours*2 of operating time with the supplied 980 mAh Lithium-Ion battery pack.

*1 Depending on version.

*2 Typical operation with Tx (Hi): Rx: standby=5:5:90

Large buttons and slim dimensions

Thanks to the large, easy-to-operate buttons, the IC-M35 provides intuitive operation. A pinched-waist slender body makes it easy to hold and carry the radio, and is surprisingly compact for a floating radio.

Other features

- Waterproof construction equivalent to IPX7 (1m depth for 30 minutes)
- Dual/Tri-watch functions
- 4-step battery life indicator
- Auto scan function
- Instant access to Ch 16 or programmable call channel
