

LIQUID ELECTRICAL TAPE BLACK

The original Plasti Dip® made in U.S.A. is an air dry, synthetic multi-purpose rubber coating that can be easily applied by spraying, brushing or dipping. Plasti Dip® resists moisture, acids, abrasion, weathering, electrical shock, skidding/slipping, corrosion; coats and gives a comfortable, controlled, color coded grip to all types of tools: lawn and garden, mechanical, electrical, woodworking, and masonry.

Plasti Dip® is not just for tool handles. It can also be applied to:

- Wood : seals and protects from weathering and prevents splinters
- Metal : reduces vibration, deadens sound, prevents corrosion, insulates electrically and from extreme temperatures
- Glass : shatterproofs glass objects (available in clear)
- Rope/Fabrics : weatherproofs, prevents rotting and fraying
- Plastics : protects delicate surfaces from scratches
- Rubber : weatherproofs, wear resistant
- Tools : gives color coded grip to all types of tools
- Maps : weatherproofs, tear resistant (available in clear)

Liquid Electrical Tape - Brush-on insulation

Liquid Tape Electrical is an air-dry, synthetic rubber coating that can be brushed on and exhibits excellent moisture, acid, alkaline, abrasion, and dielectric resistance. Liquid Tape can be used in manufacturing to insulate, protect, and color code connections. Liquid Tape has the strongest dielectric protection on the market; 1,400 v/mil, 5 – 7 mils per coat. It remains flexible even under extreme conditions and won't crack, harden, or peel.

Liquid Tape is excellent for use in: Manufacturing of electrical connections and components for boats, trailers, RVs, autos and trucks, timers, outdoor wiring, instruments, computers, circuit boards, switches, and more!
