

# PLASTIDIP PEARLIZER 3,79 L

## PEARLIZER GIVES A PEARLESCENT SHEEN TO YOUR PLASTIDIP COATING !

PlastiDip Pearlizer is the latest addition to our line PlastiDip Enhancers Glossifier and Metalizer glod, silver and copper.

Plasti Dip Enhancers are specially designed to make the already-outstanding Plasti Dip home solution even better. The enhancers are easy to use and will give any Plasti Dipped item a unique look.

Both original and spray-on Plasti Dip are available in a number of ready-made colors, and the Create Your Color Kit allows you to mix PlastiDip in any hue you can imagine. Now, with PlastiDip Metalizer, you can further customize the colors of your PlastiDip projects. Available in Gold, Silver and Copper, PlastiDip Metalizer adds a shimmering, metallic finish while letting the color of the PlastiDip underneath show through.

In a similar vein, PlastiDip Pearlizer will add a one-of-a-kind luster to any dried, cured PlastiDip coating. It gives a pearlescent sheen and a subtle white tint to any color Plasti Dip. It actually looks like a thin layer of frost. Plasti Dip Pearlizer is a great way to give your DIY project a distinctive, yet understated, finish.

PlastiDip Glossifier, PlastiDip Pearlizer, as well as Plasti Dip Metalizer Gold and Silver are now also available in 3,79 L (1 gallon).

PlastiDip Enhancers are formulated to bond with the unique chemical structure of cured PlastiDip for superior adhesion and long life. PlastiDip Enhancers are not recommended for use on any other surface.

Using Plasti Dip Spray in cooler temperatures may affect drying times, finish quality, and spray performance. If you plan on spraying your project in cooler conditions, we recommend pre-warming the aerosol can by placing it in a warm room and allowing the contents to reach room temperature. Additionally, cooler conditions may affect the surface you are spraying. If you are concerned about spraying your project in cooler temperatures, test in an inconspicuous area first to ensure the resulting finish will be what you're looking for.

See product labels for further information.

Suitability for application, and performances of finished goods coated with PlastiDip, is the sole responsibility of the customer and end user. Product and item design, pre-treatment, coating conditions, quality assurance and conditions of product end use, are among the factors that affect performance of the coated products, and are outside the control of ClassicInternational. Classic International expressly denies specific or implied warranties, including warranties for fitness for a particular use or purpose.
