

PLASTIDIP RERACK

REPAIR DISHWASHER RACK

Consumers have been asking Plasti Dip International for a dishwasher rack repair for years and now it's available in a 1-oz brush on bottle. The flexible, specialty rubber coating exhibits excellent adhesion to dishwasher and other vinyl coated racks. ReRack is ideal for touching up rusted and damaged dishwasher racks and eliminating the transfer of rust onto dishes. This high-strength formula is heat and water resistant, will not peel or pop off during high water pressure washes, and will bond to most pre-coated vinyl wire racks including: shower caddies, wire closet / shoe organizers, and draining racks. ReRack synthetic rubber coating will last and provide protection for years.

Available in 1-oz Brush-In-Cap carded. Color: white.

Learn more by reading the ReRack brochure below.

Suitability for application, and performances of finished goods coated with PlastiDip ReRack, is the sole responsibility of the customer and end user. Product and item design, pre-treatment, coating conditions, quality assurance and conditions of product end use, are among the factors that affect performance of the coated products, and are outside the control of ClassicInternational. Classic International expressly denies specific or implied warranties, including warranties for fitness for a particular use or purpose.
