

PLASTIDIP SPRAY REFLEX

SPARKLING AND SHINING

Plasti Dip® Reflex combines ultra reflective particles with a clear base. When hit with light from a directional light source, (headlight, flashlight, etc.) Reflex's retroreflective particles send a high amount of the light back to its source. Where high visibility is a must Plasti Dip Reflex will make you stand out. Be Safe; Be Seen; Use Plasti Dip Reflex.

To get the best results from Plasti Dip Reflex we recommend starting with a good base coat of another color of Plasti Dip. Over this spray 2-3 coats of Reflex. Hold the spray can further away than normal. You want to apply Reflex slightly rough so it shows a textured dust coat. Once it's dry buff with a cloth to bring out the best effect.

Durable, flexible and waterproof, Plasti Dip Reflex protects your stuff from the elements while increasing its conspicuity.

Suitability for application, and performances of finished goods coated with PlastiDip, is the sole responsibility of the customer and end user. Product and item design, pre-treatment, coating conditions, quality assurance and conditions of product end use, are among the factors that affect performance of the coated products, and are outside the control of ClassicInternational. Classic International expressly denies specific or implied warranties, including warranties for fitness for a particular use or purpose.
