

PREVAL PORTABLE SPRAY

SPRAY SUITABLE FOR SMALLER PLASTIDIP PROJECTS

In one word, Amazing the Preval Sprayer!

The Preval Sprayer is an aerosol-based spray system that allows the user to mix up any paint, chemical or solution and turn it in to sprayable material through Preval's patented Venturri Vacuum Process. This process draws the medium from the attached reservoir and delivers a professional-grade finish on virtually any surface without mixing the propellant and medium together.

Procedure

- Choose a liquid PlastiDip color
- Add tint or pigment as required
- Stir the substance very well
- Dilute with PlastiDip Thinner (max. 1:1)
- Again stir the substance and pour into the container
- Attach the power unit to the container and

..... your Preval Spray is ready to go !

The container can be filled up till max. 170 ml. With one power unit approx. 500 ml can be sprayed. This value is just an indication. Replacement power unit and glass jar can be ordered separately.

Hold the prayer upright, 15-25 cm from the surface being sprayed. Once product container has been attached to the power unit, never shake the sprayer!

The Preval Sprayer is supplied with power unit and glass container.
