

PLASTIDIP TINT ADMIRAL BLUE

CREATE YOUR OWN PLASTIDIP COLOR BY MEANS OF THE ORIGINAL TINTS/PIGMENTS

PLASTIDIP TINTS - New !

This new PlastiDip Tints is a series of liquid concentrated pigments, which has been specially developed to create individual PlastiDip colors or enhancing existing colors.

Determine the correct mixture by adding PlastiDip pigment in small quantities until the desired color is achieved. Thoroughly stirring to obtain complete homogeneity.

In order to retain the properties of PlastiDip it is recommended not to mix more than 227 grams of pigment(s) (= 1 bottle) to a gallon (3.79 liters) PlastiDip.

The PlastiDip pigments are currently available in resealable plastic bottles with a capacity of 227 grams in the colors:

- Admiral Blue
- Flake White
- Lamp Black
- Tropical Red

Additional colors now available:

- Yellow Ochre
- Green Medium
- Cobalt blue
- Sandalwood
- American Vermillion
- Ultramarine Blue
- Lavender
- Gold

Shake PlastiDip pigment well before using!

Suitability for application, and performances of finished goods coated with PlastiDip, is the sole responsibility of the customer and end user. Product and item design, pre-treatment, coating conditions, quality assurance and conditions of product end use, are among the factors that affect performance of the coated products, and are outside the control of ClassicInternational. Classic International expressly denies specific or implied warranties, including warranties for fitness for a particular use or purpose.
