

MFJ 1263

MICROPHONE CONTROL CENTER 2 MICROPHONE | 2 TRANSCEIVERS

MFJ's new Microphone Control Center lets you mix and match any two microphones to any two transceivers. Internal jumpers configure the MFJ-1263 for your microphones and transceivers.

The microphones or transceivers can have 8-pin round or 8-pin modular connectors. You do not have to change connectors or rewire- just push the buttons. You can use your favorite microphone with your present or new rig by pushing a button. You can instantly switch from a hifi ragchewing mic to a hard-hitting DX mic.
