

PLASTIDIP SPRAY MATTE

REGULAR COLORS AND SMOKE

The original PlastiDip® made in U.S.A. is an air dry, synthetic multi-purpose rubber coating that can be easily applied by spraying, brushing or dipping. PlastiDip® resists moisture, acids, abrasion, weathering, electrical shock, skidding/slipping, corrosion; coats and gives a comfortable, controlled, color coded grip to all types of tools: lawn and garden, mechanical, electrical, woodworking, and masonry.

PlastiDip Spray Smoke

PlastiDip Smoke is a special formulation with a translucent, black-gray color. It's distinctive look is great for automotive projects and 1,001 other uses. PlastiDip Smoke will give your custom car—or any project—a one-of-a-kind look.

Unique among PlastiDip varieties, PlastiDip Smoke's color changes gradually as more coats are added. After just one or two coats, it's a light, smoky gray. Each additional coat gives PlastiDip Smoke a darker, deeper hue—from gray to charcoal to black, all with the same distinct smokiness.

Like all types of PlastiDip, PlastiDip Smoke creates a protective coating that protects against abrasion, corrosion, mild impact, and the elements. It can be applied to nearly any substrate surface, and creates a soft, rubbery, easy-grip surface.

PlastiDip® is not just for tool handles. It can also be applied to:

- Wood : seals and protects from weathering and prevents splinters
- Metal : reduces vibration, deadens sound, prevents corrosion, insulates electrically and from extreme temperatures
- Glass : shatterproofs glass objects (available in clear)
- Rope/Fabrics : weatherproofs, prevents rotting and fraying
- Plastics : protects delicate surfaces from scratches
- Rubber : weatherproofs, wear resistant
- Tools : gives color coded grip to all types of tools
- Maps : weatherproofs, tear resistant (available in clear)

Flexible, air-dry synthetic rubber coating, that can be easily applied by dipping. Dip the desired number of layers. Let the coating dry for approx. 4 hours. Also suitable for industrial purposes. Content: 325 ml. Coverage approx. 0,5-1 m² per can.

Suitability for application, and performances of finished goods coated with PlastiDip, is the sole responsibility of the customer and end user. Product and item design, pre-treatment, coating conditions, quality assurance and conditions of product end use, are among the factors that affect performance of the coated products, and are outside the control of ClassicInternational. Classic International expressly denies specific or implied warranties, including warranties for fitness for a particular use or purpose.
